SUMMARY

Frontend Developer building thoughtful, responsive digital products for the web. Experienced with React, Next.js, TypeScript, and Tailwind CSS, with a focus on clear interfaces, responsive experiences, and thoughtful visual detail.

EXPERIENCE

Freelance Content Creator & Designer — Galle Sofa House • Galle • Dec 2025 — Present

- Created branded visual assets across social media, leaflets, promotional videos, showroom materials, and a sofa catalog, using AI-assisted image and video workflows to develop and refine product and character visuals.
- Supported the business with social media content creation and paid post promotion.

SELECTED PROJECTS

01 Wordulary — Next.js • TypeScript • Supabase • Gemini API • Tailwind CSS

AI-powered vocabulary learning application for building, organizing, and learning a personal vocabulary library. Designed a focused learning workflow around vocabulary collection, custom collections, learning status, and AI-generated content.

Built authentication and user-specific data with Supabase, including Row Level Security, while integrating Gemini to generate definitions, examples, synonyms, antonyms, and difficulty levels.

Live Demo GitHub

02 Invoice Generator — Next.js • TypeScript • Tailwind CSS • shadcn/ui • html-to-image

Mobile-first invoice generator for small businesses, designed around a live A4 document preview and straightforward export workflow. Built editable invoice workflows with line items, discounts, customer/payment details, automatic invoice numbering, and device-local persistence.

Implemented PNG export and a dedicated print view for clean A4 PDF output without requiring an account or backend.
